### TOTAL = 72.0 UNITS

\*It is strongly recommended that part or all of the general education requirements be completed prior to admission to the nursing education program or during summer sessions.

**PLEASE NOTE:** Students are responsible for completing the General Education requirements for the Associate Degree prior to taking the National Licensure Examination (NCLEX-RN). It is imperative that each student plans their educational program to complete these courses in a timely manner. English, Speech, Sociology, and Psychology must be completed prior to applying for the licensing examination.

Students completing the nursing education program without completing degree requirements will be limited in their ability to transfer to baccalaureate institutions or practice nursing in other states.

The preceding information is subject to change.
